

IN-TUNNEL SUCCESSSES

Around the
World

WE SIMPLIFY **5G**
THE EVOLUTION TO

RFS TRANSFORMS COMMUNICATIONS IN TUNNELS

RFS is the global leader in communications solutions for tunnels. Our in-tunnel solutions have been delivering high quality, uninterrupted communications in some of the world’s most high-profile and challenging tunnels for more than four decades. Today, we continue to demonstrate our leadership with innovative, future-ready solutions that bring 5G to tunnels.

Our RADIAFLEX® radiating cables are at the heart of our in-tunnel solutions. These innovative broadband cables eliminate the need for traditional antennas in confined spaces. And they are one of the main reasons wireless communications providers around the world choose our solutions for the toughest in-tunnel applications.

RADIAFLEX cables deliver everything needed to improve in-tunnel wireless communications today and tomorrow.

SUPPORT ANY APPLICATION

RADIAFLEX cables support multiple operators, frequency bands and technologies so they’re ideal for any public safety and commercial wireless applications in tunnels.

FUTUREPROOF INVESTMENTS

RADIAFLEX cables support all services up to 6 GHz and include 5G-ready cables that provide ultra-wideband frequency coverage to 3.8 GHz with no stopbands between 610 MHz and 3.8 GHz.

ACCELERATE IN-TUNNEL WIRELESS SPEEDS

Combining vertically polarized and horizontally polarized RADIAFLEX cables optimizes MIMO conditions in tunnels and set a world record for in-tunnel download speeds in 2018, reaching 560 Mb/s.

IMPROVE COMMUNICATIONS QUALITY

RADIAFLEX cables feature low longitudinal and coupling losses and can be provided with coupling loss configurations that are optimized for longer cable runs.

INCREASE FIRE SAFETY

RADIAFLEX cables meet all major international flame and fire-retardance standards and achieved the top Construction Products Regulation (CPR) rating of B2ca with a d0 droplets rating.

A complete range of robust, high-performance RADIAFLEX cable, connectors, clamps, and cable ties ensures installations are efficient and cost-effective.

PROJECTS CLOSE UP

GRAND PARIS EXPRESS

France | 2 Phases, 2021-2030

RFS RADIAFLEX® radiating cables have been selected to deploy a 2x2 MIMO private LTE network. The cables fulfilled all projects needs with regard to future-readiness and the highest fire safety requirements according to the European Construction Product Regulation (CPR).

FOLLOBANEN

Norway | 2019-2020

The Follobanen project features a unique 4x4 MIMO solution deployed in Norway, which set the world record for in-tunnel download speeds in 2018. RFS' vertically polarized RAY and horizontally polarized RLK product families take advantage of unique cross-polarization effects to optimize MIMO conditions in tunnels.

METRO RIO DE JANEIRO

Brazil | 2020

After the World Championship and Olympics, best-in-class RADIAFLEX® is selected again for Rio's latest 4G multi-band, multi-operator in-tunnel wireless network deployments.

NEW YORK METRO

USA | 2019

High capacity wireless systems in multiple subway and railway tunnels in dense urban New York City area.

SINGAPORE METRO

Singapore | 2019-2020

Extension of world-class public transportation system relying again on long-term first choice RADIAFLEX.

IN-TUNNEL PROJECT HIGHLIGHTS

RFS in-tunnel solutions are deployed in some of the most iconic tunnels in the world – old and new. Here's a summary of key projects* that leverage our solutions.

PROJECT DESCRIPTION	YEAR	PROJECT TYPE
ARMENIA		
Metro Yerevan	2017	Metro/Subway
BRAZIL		
Tunel Transolimpico Urban tunnel, SISO implementation	2018	Road
Oil Platforms (28 units) Petrobras UHF Radio 450MHz retrofit DMR	2019	Vertical/Enterprise
 Rio De Janeiro Metro	2020	Metro/Subway
BULGARIA		
Metro Sofia Line 3	2017	Metro/Subway
CANADA		
Montreal Metro	2017	Metro/Subway
PTC Positive Train Control Radio Project	2017	Rail
Road tunnel in British Columbia	2017	Road
Toronto Metro	2017	Metro/Subway
Canadian Metro Public Safety and WiFi	2019	Metro/Subway
CHINA		
Jinan Metro line R3	2017	Metro/Subway
Jinan R1 LTE	2017	Metro/Subway
Lanzhou Line 1 mission critical radio	2017	Metro/Subway
Nanning Line 3 LTE	2017	Metro/Subway
Nanning Line 3 mission critical radio	2017	Metro/Subway

*Contact RFS for earlier references (1970's to 2016)
